Cal OES SOUTHERN REGION

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) are scaling up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved.
- CDFA confirmed that there is no public health risk due to this virus.
- Cal OES Southern Region continues to assist CDFA in identifying a facility in the immediate area of the CDFA district office in Ontario, San Bernardino County, to expand operations as the current Incident Command Post (ICP) is too small for the current number of responders and supplies.
 - CDFA expressed interest in some facilities on a list the Cal OES Southern Region Agency Representative (AREP) obtained from San Bernardino County Real Estate Services. Appointments will be made 05/29/18, to inspect the facilities.
 - An inquiry will also be made 05/29/18, with the California Department of General Services (DGS) to locate available facilities in the area.

Activations

 San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployment

- One (1) Cal OES Science and Technology Advisor deployed on 05/29/18 until 06/01/18 to the CDFA/USDA ICP as a Biosecurity Infectious Disease Subject Matter Expert with an operational period of 0700-1900 hours.
- One (1) Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- One (1) Cal OES Logistics Section Chief deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

WEATHER OF CONCERN

Weather of Concern

- Well above-average temperatures continue today.
- · Afternoon and evening thunderstorms are possible over higher terrain through Thursday.
- Dangerous Fire Weather is expected Wednesday and Thursday across the Colorado River Valley, portions of San Bernardino County due to S or SW winds of 15-25 mph with gusts of 30-40 mph possible (strongest winds are expected Thursday) and humidity 5-10% in the valleys and 10-15% in the mountains.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

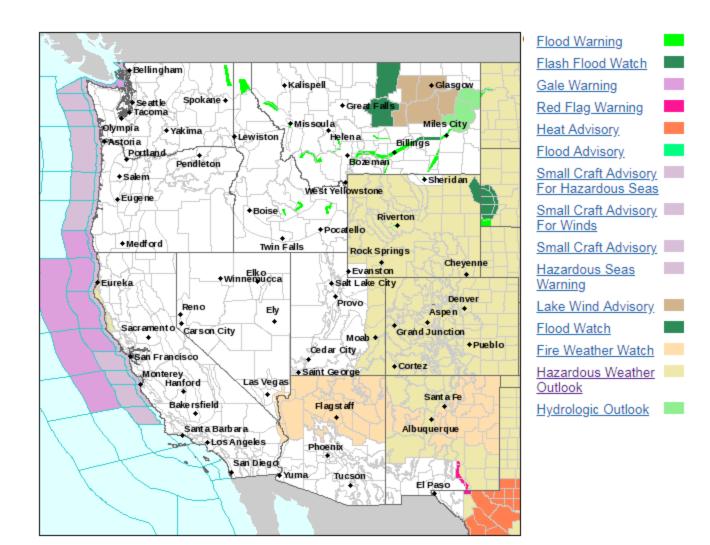

A change toward cooler weather will start today as the high pressure that brought the warmest temperatures of the season to the region Monday moves east. A weather system will be moving into the region Wednesday and Thursday with much cooler conditions and higher relative humidity (RH). A few afternoon showers or isolated thunderstorms may develop over our eastern mountains today with more possible across the northern and eastern mountains Wednesday and Thursday afternoons. Today's storms might be a little dry, but Wednesday and Thursday's will be wetter. High pressure returns for the weekend with drier, warmer conditions again into early next week. Afternoon high temperatures today will be on the order of 10 degrees above normal, but by Thursday they will be about 20 degrees cooler with the warmest inland areas in the low and mid 70s. Warming over the weekend will return conditions to near normal with the mid and upper 80s in the warmest locations. Areas of gusty afternoon SW to W winds will develop daily with peak gusts of 20-30 mph, mainly of the coastal counties and through The Delta, but they will be quite widespread across the region Wednesday afternoon as well.

SOUTHERN CALIFORNIA

A deeper marine layer this morning will keep low clouds entrenched along the coast and in the valleys for a bit longer today, and as a result, temperatures will be a degree or two cooler over many areas. Expect highs to range from the upper 60s at the coast to the 90s in the San Joaquin Valley and lower foothills. The desert will see highs up to 105. Isolated thunderstorms will be possible in the Sierras again today, but they should be fewer in number overall. Some buildups and one or two thunderstorms will be possible this afternoon across the San Bernardino and eastern Cleveland National Forest. Later this week, a trough will develop across the area, leading to stronger onshore flow and cooler temperatures. West winds of 20-30 mph will be commonplace in and near the desert Wednesday which will probably increase to the 30-40 mph range Thursday. Southwesterly flow should bring an end to any convection by Thursday. Temperatures will fall 8-12 degrees with highs back in the 80s in the valleys for the second half of the week. Winds should become light by Friday. This weekend, a weak ridge will bring warmer temperatures and less marine layer stratus. Highs will climb back into the upper 80s in the valleys and upper 90s in the San Joaquin Valley. Some low desert locations may break 110 for the first time this season on Saturday. Slightly cooler weather will return next Monday along with isolated thunderstorms in the Sierras.

WEATHER MAP

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

• 2018-LAW-46919, 05/28/18, 1320 hours: The International Emergency Response Coordination Center (IERCC) reported an inReach device activation at 34° 07' 39.8" N, 116° 50' 18.9" W, which plotted to the Dry Lake Trail in the San Bernardino County wilderness. Per the emergency contact, the registered owner of the device was leading a Boy Scout troop on a hiking trip in the area of the device activation. Messages from the device indicated that a 14 year old boy was having a severe allergic reaction, an epinephrine autoinjector (Epipen) was deployed, and immediate rescue was requested. San Bernardino County Sheriff's Office was notified and initiated a Search and Rescue (SAR) mission. At 1505 hours, SAR personnel located the group. The victim was stabilized and transported via ground ambulance to the nearest hospital for treatment. Mission Closed.

Cal OES MISSION TASKING

Cal OES Missions

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
